

# DISPATCH

# LINKTDS

extend your **operability.**

## Tactical Dispatch System SUPPORTS UNLIMITED LMR SYSTEMS!

*Automated Gateway configuration  
& discovery. No time consuming  
first-run tasks. Set up operators,  
turn the system on, and talk.*

### ✓ **Less Configuration Hassle**

No painful configuration process to get up and running. Seamlessly integrates into your existing system, allowing administrators to focus on which tasks & resources to assign to operators.

### ✓ **Standards-Based**

All internal communication protocols are standards-based, which allows extended compatibility with 3rd-party systems and devices.

### ✓ **Reliability**

No server to maintain. The system is distributed and highly available. Perfect for tactical applications.

### ✓ **User-Oriented Design**

Designed with the end-user in mind. Less training time. More efficient system operation. Less stress on the operators, which increases productivity during critical periods of heavy use.

### ✓ **Compatible**

LinkTDS is compatible with any standards-based 3rd party VoIP system. such as Cisco®, Avtec®, and Twisted Pair®. It is important to note that a LinkTDS compatible gateway. (ie. TCB-IP2) is required for signal conversion.

### ✓ **No Limit**

Operate unlimited number of radios. Hundreds of endpoints (cellular, LMR, sip) at any given time. Only limited by the capacity of your network. Tie together multiple sites through web or private satellite network. No export restrictions for outside US.

#### **System Requirements:**

- Windows XP SP3, Windows Vista SP2, Windows 7  
(Linux & OSX versions coming soon)
- Intel 1.5 GHz or AMD 1500+ processor or higher.
- 1 GB Ram
- 50 mb Disk Space  
(may grow as system expands)
- Compatible Sound Device.
