LINK COMMUNICATIONS AND CELL-TEL GOVERNMENT SYSTEMS INTEGRATE TWO-TONE PAGING INTO INTEROPERABILITY INTERFACE

BILLINGS, Mont. – Interoperable communications provider, Link Communications and partner, Cell-Tel Government Systems introduce the ability for the Tactical Communications Bridge (TCB) interoperability products to send two-tone pages to analog pager systems. “Using [Remote Control Interface software], users can now send custom two-tone paging sequences to agency pagers, all from the TCB unit” said Link Communications’ Lead Software Engineer Steve Strobel.

Until now, no interoperability interface has integrated standard radio communications with paging functionality. “If an agency’s radio system goes down, an operator can still communicate with the first responders via their standard-issue pagers,” said Link Communications’ CEO Allan Overcast. Cell-Tel spearheaded this project, realizing the unique need and feature set this addition would provide to the TCB product line. The two-tone paging functionality is included with units from the TCB-2, TCB-3, and TCB-4 product families.

Cell-Tel Government Systems, Inc., located in Jacksonville, Florida, is a small business, whose business activities and efforts focus on wireless communications products and services. Cell-Tel specializes in providing customers with complete, innovative, state-of-the-art cellular communications solutions using commercial-off-the-shelf (COTS) technologies and components.

Link Communications, Inc. has been producing interoperable communications systems since 1989. Beginning with the business-class market and expanding to the public safety market, Link Communications uses its knowledge of radio communication to effectively link multiple communications systems. Link Communications is an international leader in both business and public safety communications. With a full manufacturing facility and design team, Link Communications designs, builds, and tests all units in-house before shipping to customers. Link Communications is a Federal GSA Advantage distributor, contract GS-35F-0061R.
