

HANDI-REMOTE

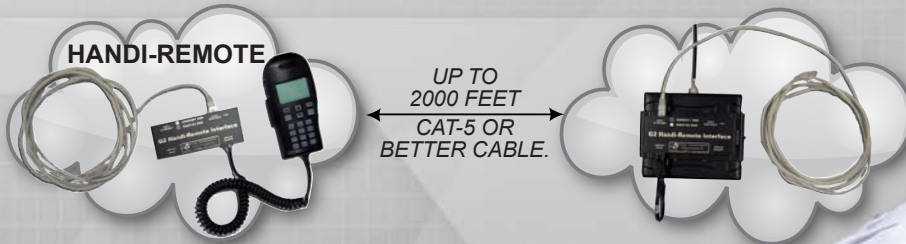

Extend your Handsets Operation on your MSAT-G2 Mobile Satellite Radio.

Communication between handset & radio that's separated up to 2000 feet.

Interface kit for the MSAT-G2 Mobile Satellite Radio system. Everything you need to get both ends extended are included with the kit, all you provide is a CAT-5/5E cable run between the two units.

- ▶ Utilizes Cat-5, Cat-5E or Cat-6, 4 pair cable.
- ▶ Plug and Play operation. No adjustments are necessary to make the system operate.
- ▶ Full handset operation without any lost features. PTT and telephone operations will operate as though the handset is plugged into the radio locally.
- ▶ All necessary parts included. No special tools needed for installation. Simply plugs into an RJ-45 connector on each end and handset begins working.
- ▶ Powered with an included +12V DC power supply on the handset end. Locally powered by 'G2 radio on the radio end.
- ▶ Radio side unit attaches to the G2 radio mounting bracket supplies with your 'G2 radio.
- ▶ No special programming or setup required.
